

Helping to improve cancer care...

Working for the NHS and Welsh Government, NOGCA looks at the care oesophageal and stomach cancer patients receive in hospitals across England and Wales.

- NOGCA uses hospital information to follow your care from when you are first diagnosed and to measure the success of your care.
- NOGCA makes suggestions to hospitals about changes that could be made to improve patient care.

Not everyone is comfortable with their information being used in this way.

- If you are happy for your information to be used, you do not need to do anything.
- If you do not want your information to be used in NOGCA, tell NHS Digital's enquiries team:
enquiries@nhsdigital.nhs.uk or 0300 303 5678

Choosing not to be in NOGCA will not affect your care.

National Data Opt-out

The national data opt-out (available to English patients only) does not apply to this audit.

If you have used the National Data Opt-out to stop your health records being shared for research and planning, you still need to tell our enquiries team if you do not want your information to be used in NOGCA. Read more about National Data Opt-out:

www.nogca.org.uk/patient-choices or scan the QR code.
